

Sabeeh Ahmad Ashir

Sabeehashir10@gmail.com — GitHub — LinkedIn

Profile

Second year Computer Science undergraduate (Current Average: 81%) combining strong Object-Oriented Programming foundations with Full Stack development experience. Proven ability in relational database architecture and robust problem solving. Actively seeking internships to deliver immediate technical value in a fast paced engineering team.

Education

Queen Mary University of London

BSc Computer Science (*Expected First Class*)

- Achieved 81% overall in first year.
- Key Modules: Object Oriented Programming (82%), Automata and Formal Languages (85%).

London, UK

2024 – Present

Projects

Noor Academy Management Platform | Next.js, React, Prisma, PostgreSQL

2026 – Present

- Engineered a full-stack educational platform with Role Based Access Control (RBAC) to securely route Admins and Parents to customized, data isolated dashboards.
- Designed a relational database schema via Prisma ORM to map user accounts to multiple dependents and manage many-to-many course enrollments.
- Built RESTful APIs for secure server side validation and implemented a strict modular CSS architecture to maintain a clean, scalable frontend codebase.

FDM Expense Management App | React, Django, Python, REST APIs

2026

- Engineered an enterprise expense tracking app using Django and React, implementing secure RBAC for distinct Employee, Line Manager, and Finance workflows.
- Architected RESTful APIs to handle secure user authentication, complex relational data, and expense claim lifecycles.
- Optimized database queries using Django ORM, ensuring high performance data retrieval for dynamic, real time dashboard updates.

Agricultural Weather Dashboard | React, Figma, API Integration

2026

- Designed and developed a specialized weather tracking application in React to optimize crop management and decision making for agricultural users.
- Integrated asynchronous third party REST APIs to fetch and visualize complex JSON climate data, delivering real time alerts and 7 day forecasts.
- Implemented dynamic state management and search functionality, enabling efficient querying of location specific metrics with minimal latency.

Experience

Noor Academy

Administrative & IT Support; Computer Science Tutor

- Spearheading the development of a custom Next.js web application to digitize and automate student registration and administrative workflows.
- Configure local IT infrastructure, manage secure user access controls, and execute routine data backups.
- Teach foundational Computer Science to Key Stage 3 & 4 students, breaking down algorithms, programming logic, and database design.

London, UK

Apr 2023 – Present

Starbucks

Customer Service / Barista

- Resolved customer issues rapidly in a high-pressure environment, utilizing agile communication and teamwork directly applicable to software development environments.
- Managed multiple priorities simultaneously to ensure precise and efficient service during peak volume hours.

London, UK

2023 – 2025

Technical Skills

- Languages:** Java, JavaScript, C++, C#, Python, SQL, HTML, CSS
- Frameworks & Tools:** React, Django, Next.js, Prisma, Node.js, Git/GitHub, Figma
- Core Concepts:** RESTful APIs, Object Oriented Design, Relational Databases, Full Stack Architecture, RBAC

Co-curricular Activities & Interests

- Community Leadership (AMYA):** Serve as Local Vice Youth Leader and Finance Secretary. Manage budgets, coordinate events, and support live broadcasting IT for Voice of Islam Radio UK.
- Tech Engagement:** Actively participate in tech meetups and industry events across London to keep pace with rapidly changing technologies.
- Interests:** Engaging communities through sports (captained college Football & Cricket teams); passionate about algorithmic problem solving and music production.
