

Sabeeh Ahmad Ashir

Portfolio — GitHub — LinkedIn

Profile

Second year Computer Science undergraduate (Current Average: 81%) combining strong Object-Oriented Programming foundations with Full Stack development experience. Proven ability in relational database architecture and robust problem solving. Seeking internships to deliver immediate technical value within a fast paced engineering team.

Education

Queen Mary University of London <i>BSc Computer Science (Expected First Class)</i> Achieved 81% overall in first year.	London, UK <i>2024 – Present</i>
--	-------------------------------------

Projects

Noor Academy Management Platform Next.js, React, Prisma, PostgreSQL - Engineered a full stack educational platform with Role Based Access Control (RBAC) to securely route Admins and Parents to customized, data isolated dashboards. - Designed a relational database schema via Prisma ORM to map user accounts to multiple dependents and manage many-to-many course enrollments. - Built RESTful APIs for server side validation and implemented a modular architecture using separate CSS files to maintain a scalable frontend codebase.	<i>2026 – Present</i>
FDM Expense Management App React, Django, Python, REST APIs - Engineered an enterprise expense tracking app using Django and React, implementing secure RBAC for distinct Employee, Line Manager, and Finance workflows. - Architected RESTful APIs to handle secure user authentication, complex relational data, and expense claim lifecycles. - Optimized database queries using Django ORM, ensuring high performance data retrieval for dynamic, real time dashboard updates.	<i>2026</i>
Agricultural Weather Dashboard React, Figma, API Integration - Designed and developed a specialized weather tracking application in React to optimize crop management and decision making for agricultural users. - Integrated asynchronous third party REST APIs to fetch and visualize complex JSON climate data, delivering real time alerts and 7 day forecasts. - Implemented dynamic state management and search functionality, enabling efficient querying of location specific metrics with minimal latency.	<i>2026</i>

Experience

Ricards Lodge High School <i>Incoming Computer Science Teaching Assistant Intern</i> - Roles include Assisting in delivering the Computer Science curriculum, guiding students through foundational programming concepts and algorithmic problem-solving. - Providing targeted one-on-one technical support during practical coding sessions to enhance student engagement and comprehension.	London, UK <i>Jun 22, 2026 – Jul 10, 2026</i>
Noor Academy <i>Administrative & IT Support; Computer Science Tutor</i> - Leading the development of a custom Next.js web application to digitize and automate student registration and administrative workflows. - Configure local IT infrastructure, manage secure user access controls, and execute routine data backups. - Teach foundational Computer Science to Key Stage 3 & 4 students, breaking down algorithms, programming logic, and database design.	London, UK <i>Apr 2023 – Present</i>
Starbucks <i>Customer Service / Barista</i> Resolved customer issues rapidly in a high pressure environment, demonstrating agile communication and task prioritization directly applicable to team based development environments.	London, UK <i>2023 – 2025</i>

Technical Skills

- Languages:** Java, JavaScript, C++, C#, Python, SQL, HTML, CSS
- Frameworks & Tools:** React, Django, Next.js, Prisma, Node.js, JUnit, Git/GitHub, Figma, Linux
- Core Concepts:** RESTful APIs, Object Oriented Design, Relational Databases, Full Stack Architecture, RBAC

Co-curricular Activities & Interests

- Community Leadership (AMYA):** Serve as Local Vice Youth Leader and Finance Secretary. Manage budgets, coordinate events, and support live broadcasting IT for Voice of Islam Radio UK.
- Tech Engagement:** Actively participate in tech meetups and industry events across London to keep pace with rapidly changing technologies.
- Interests:** Engaging communities through sports (captained college Football & Cricket teams); passionate about algorithmic problem solving and music production.
