Profile

Second year Computer Science undergraduate (Current Average: 81%) combining strong foundations in Object Oriented Programming with practical Full Stack development experience. Bringing proven skills in relational database architecture, web automation, and robust problem solving to deliver immediate technical value to an engineering team. Looking for internships to apply these technical skills in a professional environment.

Education

Queen Mary University of London

BSc Computer Science (Expected First Class)

- Achieved 81% overall in first year.
- Key Modules: Object Oriented Programming (82%), Automata and Formal Languages (85%).

London, UK
2024 – Present

Projects

Noor Academy Management Platform | Next.js, React, Prisma, PostgreSQL

2026 – Present

- Engineered a full stack educational management platform, implementing Role Based Access Control (RBAC) to securely route Admins and Parents to customized, data isolated dashboards.
- Designed a complex relational database schema with Prisma ORM to map user accounts to multiple student dependents and manage many-to-many course enrollments.
- Developed an Admin command center for processing enrollment approvals, alongside a user friendly Parent portal for managing household profiles and age restricted course registrations.
- Built robust RESTful API routes for server side validation and implemented a strict modular CSS architecture to maintain a clean, scalable frontend codebase.

Horse Race Simulator | Java, OOP, GUI

2025

- Built a dynamic simulation engine utilizing advanced OOP principles including inheritance, encapsulation, and polymorphism.
- Achieved 87% code coverage by writing comprehensive unit tests using JUnit to validate core simulation logic and edge cases.

Mythical Creature Game | Java

2024

- Developed an interactive procedural game focusing on complex control flow, multi dimensional arrays, and user state management.
- Created robust test suites to ensure game logic and conditional pathways executed flawlessly without runtime errors.

Experience

Noor Academy

Administrative & IT Support; Computer Science Tutor

London, UK
Apr 2023 – Present

- Spearheading the development of a custom Next.js web application (detailed in Projects) to digitize and automate student registration and administrative workflows.
- Maintain and update the academy's public facing website using HTML, CSS, and CMS tools, optimizing for usability and performance.
- Configure local IT infrastructure, manage secure user access controls, and execute routine data backups.
- Teach foundational Computer Science to Key Stage 3 & 4 students, breaking down algorithms, programming logic, and database design.

Starbucks

Customer Service / Barista

London, UK
2023 – 2025

- Communicated effectively in a high pressure, fast paced environment, anticipating customer needs and resolving issues rapidly, skills directly applicable to agile software development and team collaboration.
- Maintained a high standard of customer satisfaction by managing multiple priorities simultaneously, ensuring precise and efficient service during peak volume hours.

Technical Skills

- Languages:** Java, JavaScript, C++, C#, Python, SQL, HTML, CSS
- Frameworks & Tools:** Next.js, React, Prisma, Node.js, Git/GitHub, JUnit
- Core Concepts:** Object Oriented Design, Relational Databases, Full Stack Architecture, Role Based Access Control (RBAC)

Co-curricular Activities & Interests

- Community Leadership & Tech Operations (AMYA):** Serve as Local Vice Youth Leader, Finance Secretary, and Vice Regional Sports Secretary. Manage budgets, coordinate events, and support live broadcasting IT infrastructure as a Tech Volunteer for Voice of Islam Radio UK.
- Tech Engagement:** Actively participate in tech meetups, industry events across London to keep up with rapidly changing technology.
- Interests:** Engaging communities through sports (captained college Football & Cricket teams); passionate about algorithmic problem solving and music production.
